- **Italian and Swiss Citizenship**

DETAILED CAREER HISTORY

Independent Consultant & Technology Advisor, Switzerland

December 2025 –

Strategic Advisory Preparation: Defining service offerings and consulting frameworks focused on Data Cloud Platforms and AI adoption strategies.

Technology R&D & Upskilling: Conducting hands-on research and prototyping with advanced AI technologies, focusing on local LLM inference, autonomous AI agents, and browser-based automation to integrate modern AI capabilities into future enterprise data solutions.

Business Development: Actively expanding professional network and engaging in pre-sales discussions with prospective partners and clients in the European market.

EPAM Systems, Geneva - Switzerland

March 2025 – November 2025

EPAM Systems is a global provider of digital platform engineering and software development services, delivering end-to-end solutions for Fortune 1000 clients, specializing in AI, digital transformation, and custom software development.

Senior Delivery Manager: Held full accountability for delivery in all aspects, including financial, staffing, implementation, business, and regulatory requirements.

- Managed client relationships and expectations, representing delivery at the governance level, while proactively identifying and mitigating engagement risks.
- Directed multi-disciplinary teams composed of product owners, architects, engineers, and quality assurance experts to drive estimates, retrospectives, and delivery plans.
- Led and represented delivery in sales and pre-sales activities, coordinating the preparation of client proposals and statements of work to continuously drive account growth.
- Leveraged comprehensive problem-solving skills to manage an extensive workload, consistently meeting deadlines and achieving agreed objectives through a highly methodical and analytical approach.

UEFA, Nyon - Switzerland

Sept 2019 – February 2025

The governing body of European football, fully engaged into the digital transformation.

Product Owner CDP: Drove the end-to-end delivery and technical architecture of the BlueConic Customer Data Platform. Exercised full ownership over the implementation, operational setup, and Standard Operating Procedures (SOPs), successfully centralizing and managing data profiles for over 100 million football fans.

Product Owner CRM Data: Served as the central point of accountability for CRM Data Strategy, Governance, Integration, and Documentation. Led the end-to-end data lifecycle and integration architecture, ensuring secure, scalable, and high-quality data management across UEFA's entire digital ecosystem for the 100M+ fan database.

ZYTLYN Technology, Geneva – Switzerland

Nov 2020 – April 2021

Data analytics and AI start-up offering companies actionable predictive insights driven by artificial intelligence models.

Head of Technology (CTO): in charge of architecture and design of ZYTLYN's data and analytical platform.

OSB GROUP SA, Gland - Switzerland

Oct 2017 – February 2025

A Cloud Native Consulting company that enables organisations to accelerate the end-to-end cloud adoption leveraging the best consulting and technical skills available on the market.

Cloud & Data Strategist: Responsible for Data Intelligence strategic projects, from architecture to delivery of Data Cloud Platform solutions for international corporations. Key projects:

- Implementation of a Clinical Data Platform for a **Life Science research organisation** based in Switzerland
- Design and implementation of a patient churn prediction model for a private clinic in Switzerland
- Data Quality and Data Governance for a top worldwide retailer based in Switzerland

International Air Transport Association (IATA), Geneva - Switzerland

July 2007 – Sept 2017

International Air Transport Association (IATA) is the global trade organisation of the airline industry, with over 265 members (passenger and cargo airlines) representing over 94% of international scheduled air traffic.

Assistant Director, Financial Solutions & Systems Delivery in charge of some of the largest programs within the Financial and Distribution Service department:

- Directed major technology programs with accountability for financial systems managing over **\$200+ Billion USD in annual financial settlements**.
- Spearheaded the delivery of the **IATA Remittance & Settlement Integrated Solution (IRIS)**, an electronic platform managing payment instructions to settle airline funds via SWIFT Network across 120+ countries.
- Delivered key financial services solutions, including **Fraud Detection and Default Prediction** systems leveraging Machine Learning/AI on IATA financial data, and the **Simplified Interline Settlement (SIS)** system, which processes \$50 billion annually.

Assistant Director, Heading IT Services Delivery:

- Managed the IT Delivery Team (Project Managers, Business Analysts, Test Managers and Technical Architects) implementing large IT initiatives across IATA worldwide.
- Successfully delivered the global implementation of SAP across IATA offices, covering Procure-to-Pay, Order-to-Cash, Accounting, Budget, and Reporting.
- Led the **PCI compliance initiative** for all Financial Applications across IATA worldwide.

Wall Street Systems (now ION Group), Sophia Antipolis (Nice) - France

Nov 2002 – May 2007

Wall Street Systems provides functionally rich, integrated, and scalable solutions for improved workflow, control and overall productivity for corporate treasury, bank treasury, central banking, FX trading and global back-office operations.

Program & Project Manager, Financial Systems Implementation:

- Managed the implementation of large-scale **Treasury and Risk Management** systems for the Government Segment, including the **European Central Bank, European Investment Bank**, and several National Ministries of Finance.
- Management of the development of the Treasury flagship product Finance KIT and related modules, including financial and human aspects.

Quark Deutschland GmbH, Stuttgart - Germany

Oct 2000 – Oct 2002

Major American Software Company providing integrated solutions for the publishing industry.

R&D Manager: general management of the activities related to the creation of an ERP and CRM Business Application for eCommerce. Organise and plan the activities of a team of business and technical experts across Germany, US and India.

Exprivia (Ex. Artificial Intelligence Software), Milan - Italy

Oct 1996 – May 2000

A global company and the market leader in Italy in process consultancy, technology services and IT solutions.

Project Manager, Financial Technology:

- in charge of projects in the **financial area**, including the implementation of a web-based mutual funds trading system for a large Italian bank.
- Overall project management (business concepts analysis, software design, development, and testing) and coordination of a project team of fifteen people.

Thomson Reuters, Milan - Italy

Jun 1993 – Sep 1996

Thomson Reuters is the world's leading source of intelligent information for businesses and professionals.

Software Analyst and **Project Leader** responsible for the implementation of a complex integrated system to contribute prices of shares and bonds for Italian trading rooms.
